

RIDGE & HIP DRY FIX

Lama Ridge & Hip Dry Fix is a solution to replace traditional wet cement mortar fixing. Its highly stretchable coated aluminium side surfaces ensures neat sealing between the ridge/ hip and the roof tiles while the water resistant fabric allows hot air trapped under the roof to exit and preventing water from seeping in. Lama Ridge & Hip Dry Fix has a self adhesive butyl backing allowing for effective self-fixing on to clean and dry tile surfaces.

TECHNICAL DATA

Material	Breathable Water Resistant Fabric & Waterproof Side Surfaces
Surface colour	Terracotta/ Black
Length	10 m
Width	295mm
Storage condition	0 – 38°C
Recommended specification	Lama Ridge and Hip Dry Fix is to be installed with ridge runners/ saddle combined with Lama Ridge Tree brackets in accordance with Lama's recommended installation techniques.

RIDGE TREE

Lama Ridge Tree is a bracket that provides fast and convenient installation as well as easy levelling of the ridge runner/ saddle.

TECHNICAL DATA

Material	Galvanized steel
Application	1 piece per rafter at the ridge or hip
Recommended specification	Lama Ridge Tree support with timber (by other) to be installed with Lama Ridge and Hip Dry Fix in accordance with Lama's recommended installation techniques.

FLASHING STRIP

Lama Flashing Strip is nailed / screwed over Lama Abutment Dry Fix and the wall to provide sealing against water ingress. The top opening of the Flashing Strip is additionally sealed with weather resistant sealants.

Technical data

Material	Aluminium
Width	90 mm
Length	1 m
Colour	Terracotta & Black
Recommended Specification	Lama Flashing Strip is to be installed together with Lama Abutment Dry Fix and installed in accordance to Lama's recommended installation techniques.

ABUTMENT DRY FIX

Lama Abutment Dry Fix is a solution to replace traditional metal flashings for wall flashing. Its highly stretchable coated aluminium composite surface allows for neat sealing between the walls and the roof tiles while the surface provides a high level of durability. Lama Abutment Dry Fix has a self adhesive butyl backing allowing for effective self-fixing on to clean and dry surfaces.

Technical data

Material	Coated aluminium composite with butyl
Width	275mm
Length	10m
Colour	Terracotta & Black
Storage Condition	0 – 38°C
Recommended Specification	Lama Abutment Dry Fix is to be installed together with Lama Flashing Strip and installed in accordance to Lama's recommended installation techniques.

RIDGE CLIP

Lama Ridge Clip is to fasten and secure the ridges, keeping the ridges in position regardless of strong winds without the use of conventional wet cement mortar fixing, thus providing a fast, clean and leak proof installation.

Technical Data

Material : Aluminium

Colour : Terracotta & Black

BIRD COMB

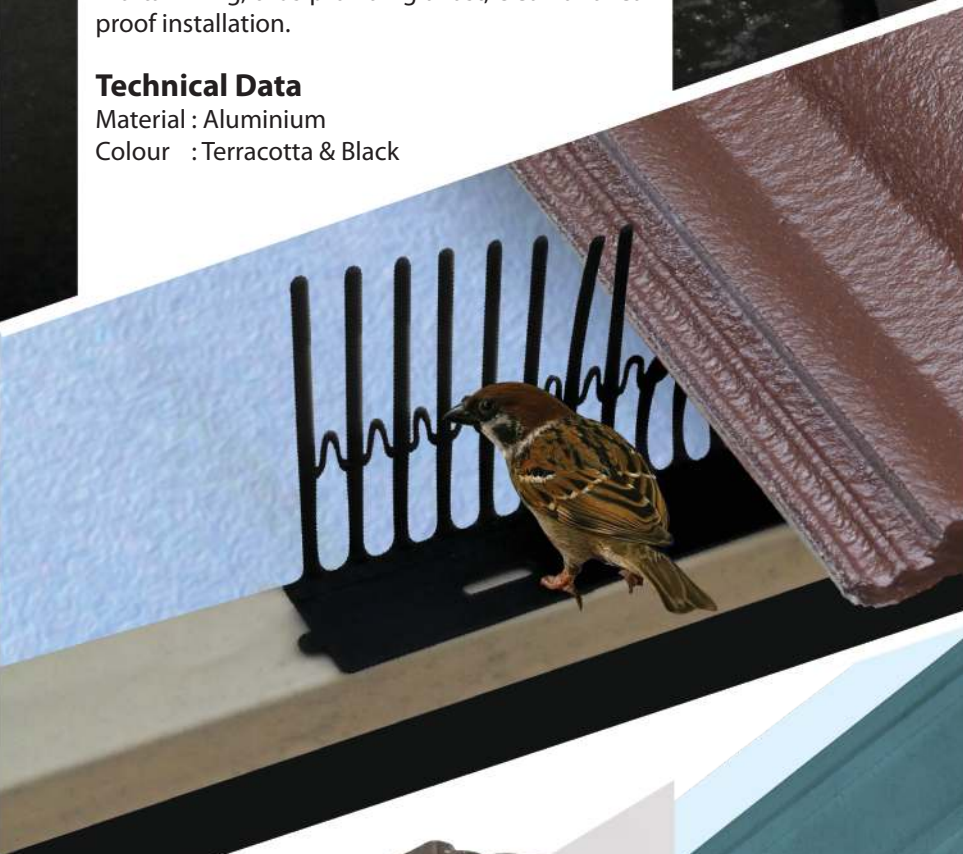

Lama Bird Comb is made from polypropylene and is installed at the eaves of the roof to prevent the ingress and nesting of birds, rodents or other bigger insects.

Technical Data

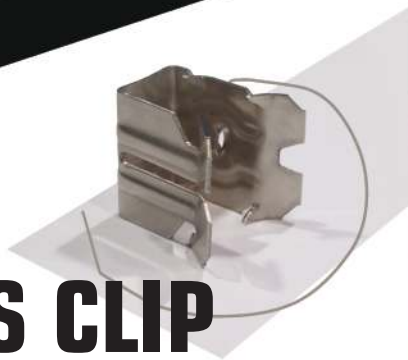

Material : Polypropylene (PP)

Colour : Black

Coverage : 2 pcs / meter run

CUT TILES CLIP

Lama Cut Tiles Clip is to secure cut tiles at the valley and hip especially tiles that are cut across the batten lugs.

Technical Data

Material : Stainless steel

Wire : Stainless steel
